

# **DEAN IS DIFFERENT**

INDEPENDENTS 4 CHANGE

Dean Mulligan is Clare Daly's candidate in election 2020.

A new Councillor from Swords, a local and national campaigner, he works as a social worker with people with disabilities and has specialised in addiction.

For accountability and fairness, to hold those in power to account, as a voice or young people and the future, Dean is your best bet to shake up the status quo.

On February 8th, please give him your No. 1 or your highest possible preference

**DEAN  
MULLIGAN**

Dear Resident,

Ireland is now the 5th richest country in the world.

We have more wealth per capita than almost any other country in the world with Luxemburg the only wealthier country in the EU.

So why do we have 3,752 homeless children, 749,490 people on hospital waiting lists, among the largest class sizes, and lowest pay in the EU?

Politics is the answer. The free market is prioritised over desperately needed interventions in housing, education, healthcare, climate justice, transport and workers' rights.

For the past 70 years Fianna Fail and Fine Gael have led every government with the support of either the Labour Party or the Greens. If you believe they have done a good job, by all means vote for them. But, if you believe, like me, that you and your family deserve a higher quality of life with a better standard of living, I am asking you to give me your vote.

I have successfully campaigned alongside Clare Daly MEP against water charges, for marriage equality, for Repeal of the 8th Amendment, for the abolition of zero hour contracts and stronger workers' rights. I have campaigned locally and nationally for more investment in housing, transport, healthcare and against tax cuts for big business and the wealthy.

If you are tired of commuting for two hours a day and want more investment in public transport because you're missing out on valuable time with your family; if you are struggling to pay your bills because of low pay and the high cost of living; if you want reassurance that if you get sick you will have adequate healthcare; if you want your children to have any prospect of having their own home in the future rather than being forced to emigrate; then you should vote for change.

Voting for the same old parties with their failed policies will result in more of the same. We can and we should do much better. Vote for a candidate with a track record of standing up for you at a national and local level.

I am asking for your number 1 vote or highest preference.

Yours,

*Dean Mulligan*
